Dr. Zeiger Appointed Essay Contest Chair
Dr. Jessica Zeiger has written four excellent winning student essays on historical aspects about artificial insemination (1st place 2018), rabies (1st place 2017), surgical anesthesia (2nd place 2017), and farriery (4th place 2016). All except the last, which is coming in November, have been published in Veterinary Heritage. She also helped staff the AVMHS booth at AVMA in Indianapolis and contributed a poster for display there. Having taken Professor David Williams’s veterinary history courses at Purdue, her interest and enthusiasm for the historical background of veterinary medicine has flourished.

With those accomplishments in mind, we are delighted that Dr. Zeiger has been appointed to chair the Smithcors Student Veterinary History Essay Contest Committee beginning with this year’s 2019 contest. She replaces Dr. Russell W. Currier, currently AVMHS president, who has administered the contest since 2008-2009.

Awarded her DVM degree from Purdue this past spring, Dr. Zeiger (jzeigerdvm@gmail.com) is currently practicing in Niles, Michigan. Feel free to contact her and help the Society get the word out to prospective student essayists at veterinary colleges in the U.S. and Canada. The submission due date is April 15, 2019.

Dr. Owens to Coordinate the Registry
Lesley Ann Gentry (lesleyann.gentry@gmail.com) has been our able coordinator of the Registry since its establishment in 2006. She got the program going and has been responsible for researching and identifying many veterinary practices that are over 50 years old. In addition, Lesley obtained a grant from Pfizer in 2011 to produce special wooden wall plaques for presentation to a number of practices. Consequently, we were disappointed when she recently expressed a wish to step aside, but understand her need to devote more time to family and personal matters. She will remain involved with the program as an advisor and continue to help locate heritage practices, especially in Kansas.

In Lesley’s absence, we are very pleased that Dr. Jerry Owens (jowensdvm@aol.com), currently president-elect, expressed willingness to become the next coordinator. He is familiar with many long-standing practices in California and has contacts in various other states for locating additional early hospitals across the country.
From now on, please contact Dr. Owens at 510-506-0998 for Registry information and forward any new practices uncovered to his attention.

Report on AVMHS in Denver July 2018

As reported by Dr. Russ Currier, the meeting in Denver went well and interest by exhibit hall attendees visiting our booth was “reassuring.” Having handed out all of the copies prepared in advance, he said it was necessary to print more membership forms at the meeting.

Special thanks is extended to Dr. Howard Erickson who helped staff the booth which included two posters, one on the essay contest and the other on the history of AVMHS, previously prepared by Dr. Boris Brglez. In addition to a display copy of Dunlop and Williams’ book, there were brochures and other handouts, along with this year’s meeting announcement postcard.

See our annual report in the October 1, 2018 issue of JAVMA or find it online at “Veterinary groups meet in Denver,” compiled by Anita Suresh, JAVMA News, vol. 253, No. 7, October 1, 2018, pages 831-832 at: https://www.avma.org/News/JAVMANews/Pages/181001e.aspx

Posters from Denver AVMA Meeting

Two of our AVMHS members successfully gave poster presentations at the 2018 AVMA convention in Denver.

They included:

#A21 Pioneer Veterinarians of Colorado and the West
Howard H. Erickson, DVM, PhD

#A24 The Early History of Veterinary Medicine in Illinois
Shannon Greeley, DVM

In addition to displaying the posters in a special section of the exhibit hall for browsing by convention attendees during open hours, authors staffed their posters for an hour on Sunday afternoon. This enabled attendees to ask questions and interact with the presenters.

As required by Bylaws, Dr. Currier also indicated that the AVMHS annual meeting was held with five members and officers present to address functional business matters. This is not unusual since it is recognized there are a myriad of competing interests at such large professional meetings along with logistical concerns for many of our members who are retired to justify travel expenses to attend AVMA conventions. Even without being present at the annual meeting, members should feel free to express interests and suggestions for the organization at any time.

In addition to electing new officers (see below) and other business items, President-elect Currier discussed the need to expand our membership to double or even triple the number to assure adequate financial support for ongoing and expanded activities. All current members are encouraged to more actively promote the Society and its mission.
Early History of Veterinary Medicine in Illinois: Leadership, Diversity, One Health,” Shannon Greely, DVM and Paul Arndt, DVM.

"From its agricultural and stockyard roots to the early private veterinary colleges, the "Land of Lincoln" holds a distinct place in the development of veterinary medicine in the United States. This presentation recognizes some of the early founders, facilities and noteworthy veterinarians in Illinois. These influential leaders contributed significantly to the advancement of veterinary medicine not only in Illinois, but throughout the Nation."

Drs. Shannon Greeley and Paul Arndt are Co-Historians of the Chicago Veterinary Medical Association. In recent years, they have been collecting, organizing and actively compiling historical background about the history of veterinary medicine and the profession in the Chicago area.

As an outstanding example of outreach and collaboration, Dr. Greeley reports that the Chicago Vet. Med. Assoc. (https://www.chicagovma.org/) became a bicentennial partner for the 200th Anniversary of the State of Illinois https://illinois200.com/sponsors/

In contributing to that state-wide celebration, this attractive poster has been included as part of their project in recognition of Illinois's Bicentennial.

In addition, the poster has been displayed at the University of Illinois College of Veterinary Medicine’s Fall Conference held on Oct. 11-12, 2018. It will also be featured at the ISVMA's Convention on Nov. 9-11, 2018 and at the CVMA's Annual Meeting on Dec. 12, 2018.

Posters presented in various venues are an excellent, visual means of telling others about veterinary medicine’s history. AVMHS members are encouraged to consider submitting posters for future AVMA meetings and seek other opportunities with state and regional VMAs or other local events to educate others about the past contributions of this versatile profession to society.

Nevertheless, be advised that it is often necessary to plan well in advance. Note that the call for posters application period for next year’s AVMA convention CE Program in Washington, DC was early and very short. (See https://www.avma.org/News/JAVMANews/Pages/180715d.aspx)

2018-2019 AVMHS Officers
The following slate of officers for this coming year were elected at the Society’s annual business meeting held in Denver.

PRESIDENT
Russell W. Currier DVM, MPH, DACVPM
1864 NW 151 Court
Des Moines IA 50325-7850
Tel: 515-987-5541
Cell: 515-710-2331
Email: ruscurrier@yahoo.com

PRESIDENT – ELECT / PROGRAM CHAIR
Jerry M. Owens, DVM, DACVR
831 Madrone Road
Glen Ellen, CA 95442-9465
Cell: 510-506-0998
Email: jowensdvm@aol.com

PAST PRESIDENT
Prof. David J. Williams
824 Carrolton Blvd.
West Lafayette, IN 47906-2342
Tel: 765-494-1156 (office)
Tel: 765-463-0277 (home)
Email: djw@purdue.edu
Dr. Margaret “Peggy” Carter of San Antonio, Texas, served as a career U.S. Army Veterinary Corps officer and commanded a number of veterinary and laboratory units in the United States before retiring in 2012 at the rank of Colonel. She is past president of the American College of Veterinary Preventive Medicine. With co-recipient Dr. Candace Jacobs, she was honored by ACVPM’s Frank A. Todd President’s Award in 2006. A 1985 graduate of the University of Missouri College of Veterinary Medicine, Dr. Carter serves on various non-profit and corporate boards, including the Army Medical Department Museum Foundation.

Dr. Jerry M. Owens lives in Glen Ellen, California. He received his DVM from the University of California at Davis in 1971 and became a Diplomate of the American College of Veterinary Radiology in 1976. Dr. Owens had a private referral specialty practice in the San Francisco Bay Area from 1976 to 2015. He is the author of *Radiographic Interpretation for the Small Animal Clinician*, and co-editor of *Manual of Small Animal Cardiology*.

In addition to welcoming one of newest at-large board members, we extend congratulations to Dr. Candace A. Jacobs who received the AVMA’s Public Health Award this past summer in Denver.

As a well-known food safety expert and consultant, Dr. Jacobs recently retired after 15 years from the Washington State Department of Agriculture where she held management positions in manufactured food, produce, and animal feed safety, organic food
certification, state veterinarian’s office, management of a microbiology lab, emergency response, and food assistance program areas. Her earlier work experience also includes 15 years as chief food hygienist with human food and beverage industries, state toxicologist for the State of Nebraska, and has been both in small animal relief/emergency and mixed practice. Dr. Jacobs is retired at the rank of Colonel from the U.S. Air Force reserves after serving as an active duty veterinarian with the Naval Ocean Systems Center.

Dr. Jacobs received her Bachelor of Science degree with honors from the University of Arkansas, her Doctor of Veterinary Medicine degree from Oklahoma State University, and her Master of Public Health degree from San Diego State University. She earned specialty board certification from the American College of Veterinary Preventive Medicine (ACVPM). Dr. Jacobs received an honorary diploma from the American Veterinary Epidemiology Society.

She currently serves on the AVMA Food Safety Advisory Committee representing the American Association of Food Safety and Public Health Veterinarians. Dr. Jacobs has also been a board member of the ACVPM and served on the AVMA Council for Public Health and Regulatory Veterinary Medicine.

**Meyerhoff Prize for Best Historical Essay**

Each year since 1956, the Medical Library Association has awarded a prize for the best unpublished paper on the history of health sciences. Initially called the Gottlieb Prize, it was renamed in honor of Erich Meyerhoff in 2016 ([https://www.mlanet.org/page/meyerhoff-prize](https://www.mlanet.org/page/meyerhoff-prize)).

This year the Meyerhoff Prize was awarded to two AVMHS members, Vicki F. Croft and Susanne Whitaker, for their essay titled, “The Role of Accreditation on the Evolution of United States and Canadian Veterinary School Libraries in the Late 19th and 20th Centuries.” Ms. Croft, MLS, AHIP, FMLA ([croft@vet.wsu.edu](mailto:croft@vet.wsu.edu)) is Animal Health Librarian Emeritus from the Washington State University College of Veterinary Medicine and Ms. Whitaker, MLS, AHIP ([skw2@cornell.edu](mailto:skw2@cornell.edu)) is retired from the Flower-Sprecher Veterinary Library at Cornell University and currently serves as the Society’s Secretary-Treasurer. Their manuscript is being submitted for publication in MLA’s *Journal*.

**1917 Gish Building on National Register**

Not only is the Society interested in supporting veterinary museums and archival collections, but also keeping track of significant buildings related to veterinary medicine that appear on the U.S. National Register of Historic Places. Dr. Howard Erickson recently alerted us to the Amos H. Gish Building, 317 South Main Street, El Dorado, Kansas, built in 1917.

National Register of Historic Places #24906, July 3, 2012 “After graduating from the veterinary program at Kansas State College in 1910, Amos H. Gish (1886-1969) moved to El Dorado to start his own business. He arrived during a period of considerable growth and development in El Dorado, which was largely in response to the discovery of oil and gas nearby. Gish selected a site along US Highway 77 near the junction of US Highway 54 in downtown El Dorado to house his new building. It was completed in 1917. His veterinary office was located on the second floor along with several apartments. He leased commercial space on the first floor, which was occupied by various auto-related businesses over the years. Gish operated his veterinary practice out of this building until his retirement in 1960, and he lived there with his family until his death in 1969. His son John Gish joined the business in 1941, and began his own practice when Amos retired. Today, the business is known as the El Dorado Animal Clinic. The building was nominated for its local significance in the area of commerce.”

El Dorado Main Street. Gish Building. ([https://eldoradomainstreet.org/gish-building](https://eldoradomainstreet.org/gish-building))

To see AVMHS’s list of the NRHP veterinary buildings we are currently aware of, please go to ([https://www.avmhs.org/veterinary-historic-places](https://www.avmhs.org/veterinary-historic-places))

**Minnesota Veterinary Historical Museum Hosted Student Printmaking Seminar**

Paul Maravelas ([mara0074@umn.edu](mailto:mara0074@umn.edu)), curator of the Minnesota Veterinary Historical Museum ([http://hist.cvm.umn.edu/](http://hist.cvm.umn.edu/)), shares the following interesting report and great photos:
“In January, 2018, the Minnesota Veterinary Historical Museum (MVHM) hosted a drawing and printmaking seminar using anatomical specimens in the Veterinary Anatomy Museum at the University of Minnesota College of Veterinary Medicine. Artist Brittany Kieler coached a dozen DVM students and their mentors in basic drawing and printmaking techniques, and each participant produced their own engraved print. The seminar introduced students to how drawing and printing were used in science and veterinary medicine in the past.”

What is Coley's Toxin?
The following announcement for a new book self-published by Donald MacAdam was received recently by Dr. Howard Erickson. It is included in this newsletter because of its potential interest to veterinary historians about how mysteries can be uncovered and things change.

Mr. MacAdam writes:
“The Reinvencion of Coley’s Toxins is the story of a company that proved a modern version of the first cancer immunotherapy could induce complete and lasting regression of cancers that no longer responded to conventional therapies.

Coley’s Toxins were invented in 1893 by Dr. William Coley when he was 29 years old. In the following 43 years Dr. Coley treated about one thousand inoperable (incurable) cancer patients with better results than would be expected for a comparable group of patients today.
The first curative cancer treatment in dogs was reported at the 1907 conference of the American Medical Association and subsequently published in the AMA Journal (SP Beebe and Martha Tracy, The treatment of experimental tumors with bacterial toxins, JAMA, Nov 2, 1907) [Beebe SP, Tracy M. The treatment of experimental tumors with bacterial toxins. JAMA 1907 Nov 2;49(18):1493-1498. https://hdl.handle.net/2027/uc1.c054588340?urlapp end=%3Bseq=1505]

Until the last pharmaceutical manufacturer ceased production in 1951, Coley’s Toxins was a mainstream cancer therapy with thousands of physicians treating many tens of thousands of patients. Outcomes were respectable but not as good as achieved by Dr. Coley.

Dr. Coley’s patients fared better than those treated by other physicians because Coley’s Toxins prepared for Dr. Coley’s personal use were more effective than the commercially available formulations.

Beginning in 2006, MBVax Bioscience produced a modern version of the formulation used by Dr. Coley and provided it free of charge to physicians anywhere in the world who could legally import the product and administer treatment.

Of three canine cancers treated there were two durable complete responses (no remaining detectable cancer for at least one year) in lymphoma (2 year old male mastiff survived 7 years) and hemangiosarcoma (12 year old female poodle survived 2+ years).

Human clinical results included durable complete responses of inoperable and/or metastatic breast cancer, lymphoma, melanoma, lung cancer, esophageal cancer and stomach cancer.

In spite of these results and the support of leading cancer researchers, medical regulators in Canada, Europe and the U.S. denied permission to commence clinical trials.

MBVax Bioscience was dissolved in 2017.

In order to ensure the formulation for this effective and inexpensive cancer therapy is not once again lost, this book conveys the complete manufacturing protocol into the public domain free to use by any organization or individual in any country.”

In following on from MacAdam’s book, answers to historical puzzles between human and veterinary medicine may eventually be uncovered.

Several years ago, Drs. Kanga Tsung and Jeffrey Norton from Stanford University Medical School did an investigative study of the biological principles behind Coley’s Toxin. They state, “Despite the fact that surgeon William B. Coley’s pioneering work in cancer immunotherapy with bacterial toxins was carried out over a century ago, the significant clinical observations and the mechanism behind it remain unexplained until now.”

**Historical Murmurs**

History can sometimes appear in unexpected places and influence current practice. For example, veterinary cardiologist Dr. Mark Rishniw has extensively researched the history of heart murmurs in humans and animals for over 200 years, from the time when “Jean-Nicholas Corvisart (1755-1821), a physician to Napoleon, placed his hand on the chest of a patient and noted ‘a particular rustle, difficult to describe, detectable by a hand applied to the precordial region…” His findings were published recently, with a proposed simpler, more intuitive murmur grading scheme, in the Journal of Veterinary Cardiology.

Dr. Rishniw concludes, “Two hundred years ago, the art of cardiac auscultation led the way to better diagnosis of heart disease and understanding of cardiac pathology. Without doubt, auscultatory skill has atrophied in clinicians as newer, more comprehensive, and accurate diagnostic tools supplant the stethoscope. However, murmuring grading still has a place in veterinary (and human) medicine. The recent developments and proposed changes to murmur grading can still provide clinicians with useful, safe, and inexpensive information.”

With implications for current practice, something can often be learned and gained from researching and understanding history.

**Gift Memberships in AVMHS**

We sincerely thank all of our members for their interest in veterinary history and support for the Society’s mission and activities. But, there are surely others who also appreciate history yet are unaware of AVMHS and might enjoy joining us. Why not consider giving a one-year “gift” membership to a friend or colleague?
To this end, Dr. Pat Arrington of Louisville, Kentucky has suggested adding this feature to the “join us” page on our Web site at https://www.avmhs.org/copy-of-join-contact-us. While we investigate how to do this with credit cards via PayPal, a form intended to facilitate the process is now available for use, if desired, on that page. It can be completed and mailed with a check.

New gratis members receive an initial welcome letter with acknowledgement of the donor, followed by two semi-annual issues of Veterinary Heritage, Interim News & Comment newsletters, and are welcome at our annual and regional meetings.

**In Memoriam: Drs. Larsen and Roncalli**

It is with deep sadness that we report the recent passing of two of our beloved and active long-time members.

**Phyllis Hickney Larsen, DVM, MPVM (1923-2018)** of Ithaca, New York, passed away on August 11, 2018. A native of Worcester, Massachusetts, she majored in zoology at Vassar College before becoming a pioneer woman graduate from the College of Veterinary Medicine at Kansas State University in 1947. Dr. Larsen later earned a Master of Preventive Veterinary Medicine degree from the University of California at Davis in 1981 where her thesis work focused on the goats of San Clemente Island.

![Phyllis Hickney Larsen](https://example.com/phyllis-larsen.jpg)

Even though she never actually practiced, her overall contributions to the profession are many. In her own words, “Dr. Larsen’s unusual career ranged from researching breeding diseases in cattle, consulting on nature and the environment in a bilingual program for children, teaching laboratory animal technicians, analyzing a population of feral goats and their diseases, and teaching English to veterinary students and others in [Beijing] China [from 1984 to 1987].” Interestingly, on their way back to California where they lived for 40 years, she and her husband took the full-length of Trans-Siberian Railway across Asia from east to west.

While serving as AVMHS president in 1999-2000, Dr. Larsen initiated a “News & Comment” section to incorporate news into issues of Veterinary Heritage and served as its reporter ever since. Over time, this expanded into separate Interim News & Comment newsletters several times a year. In 2006, she conceived the production of historical mini-stories and was successful in having them published by the Veterinary Information Network as “Time-Bites.” To date, significant progress has been made on her original goal of producing 100 such Time-Bite short stories.

Her association with AVMHS past-president Dr. Elizabeth Lawrence paved the way for obtaining our first grant funding in 2012 from the Donaldson Charitable Trust in support of prizes for our essay contest.

Even into her 80s and 90s, Dr. Larsen had seemingly boundless energy and lots of ideas for exhibit booths, regional meetings, researching Florence Kimball, encouraging young veterinary students to appreciate history, supporting international involvement, and much more. As a result, her enthusiasm and influence were far reaching and will be truly missed.

In addition to AVMHS, Dr. Larsen was active in the Association of Women Veterinarians. In 1987, she headed its History Committee and compiled the AWV’s 50th anniversary book titled, *Our History of Women in Veterinary Medicine: Gumption, Grace, Grit and Good Humor* in 1997. She was honored with the AWV’s certificate of appreciation for her service and leadership in 2013 in Chicago. She and her husband also managed the office by handled membership and the Wool & Wattles newsletter for the American Association of Small Ruminant Practitioners (AASRP) for many years.

Please find Dr. Larsen’s obituary at https://www.legacy.com/obituaries/theithacajournal/obituary.aspx?n=phyllis-hickney-larsen&pid=189900622&fhid=7362

To read more about Dr. Larsen’s background, see:

Raffaele Roncalli Amici, DVM, MS (1927-2018) of Millville, New Jersey, passed away on September 11, 2018. He received his DVM from the University of Perugia in Italy in 1949 and later earned a master’s degree in parasitology from the University of Georgia on a Fulbright Scholarship. The majority of his professional career involved developing new veterinary products, first working at Hoffman-LaRoche in creating several tranquilizers, a sulfonamide, and a coccidiostat that resulted in patents. Later, at Merck & Company, Dr. Roncalli did pioneering investigation with anthelmintics, such as thiabendazole and ivermectin, as well as coccidiostats, such as amprolium in Europe, Latin America, Japan and Australia.

We remember Dr. Roncalli as an active and prominent AVMHS member who served two terms as president in 1988/1989 and 2004/2005. He was also an annual essay contest judge for more 15 years from 1999-2000 to 2016-2017, and frequently gave interesting and well-illustrated presentations at AVMHS meetings. Moreover, when AVMHS hosted the 36th International Congress of the World Association for the History of Veterinary Medicine in Minneapolis in 2005, his leadership, guidance and support were significant and contributed greatly to the success of the meeting.

As facilitator and supporter, Dr. Roncalli was an important connection to the Merck & Company which funded the essay contest prizes and provided copies of the Merck Veterinary Manual to student essayists over many years.

A linguist of seven languages, he authored more than 100 scientific papers, especially in parasitology and the history of parasitology. Among them are: "The History of Italian Parasitology," "The History of Japanese Parasitology," and "American Women Pioneers in Veterinary Parasitology." Over the years, Dr. Roncalli collected Vatican City stamps along with many books on the history of human and veterinary parasitology, from early 1500s to the present. He also served as historian for the American Association of Veterinary Parasitologists.

Please find Dr. Roncalli’s obituary at https://rezemfh.com/tribute/details/1586/Raffaele-Roncalli-Amici/obituary.html

Wanted: New Newsletter Reporter
With the passing of Dr. Larsen this summer, a new Reporter is needed to help compile this Interim News & Comment newsletter a couple times a year.

The main Reporter identifies topics, receives news items from others, and compiles much of the content. He or she is assisted by the Secretary-Treasurer who may also suggest topic ideas, prepares the lists of new members, heritage practices, books, and journal articles as well as produces and distributes finished issues by email and print.

If anyone is interested in reporting on developments related to AVMHS and veterinary history in general, you’re help would be greatly appreciated.

Equine History Collective Conference
If you are in the Pomona, California area on November 30 to December 2, 2018, the Equine History Collective is hosting a conference at the W.K. Kellogg Arabian Horse Library at California Polytechnic University. The focus is on “Why Equine History Matters” with plenary speaker Richard Nash, professor of English from the University of Indiana Bloomington. Registration deadline in November 7. More information and the program are available at: https://equinehistory.files.wordpress.com/2018/09/ehc-2018-conference-program-updated-sept-29.pdf

New Registry of Veterinary Heritage Practices
We are pleased to welcome the following new Registry members:

Berkeley Dog and Cat Hospital (Berkeley, CA) Estab. 1909 as a mixed practice
Campus Veterinary Clinic (Berkeley, CA) Estab. ca.1966
Cotati Small Animal Hospital (Cotati, CA) Estab. 1956
Noble Veterinary Clinic (Hayward, CA) Estab. ca.1962
Ocean Avenue Veterinary Hospital (San Francisco, CA) Estab. ca.1965
Pacific Veterinary Hospital (Portland, OR) Estab. ca.1968
Redwood Veterinary Clinic (Santa Rosa, CA) Estab. 1952
Richmond Veterinary Hospital (Richmond, CA) Estab. 1946
Tamalpais Pet Hospital (Mill Valley, CA) Estab. 1954
VCA Albany Animal Hospital (Albany, CA) Estab. 1962
White’s Pet Hospital (Santa Barbara, CA) Estab. ca.1940

Send information about any practices that are older than 50 years to Dr. Jerry M. Owens jowensdvm@aol.com

New AVMHS Members
We are pleased to welcome:
Adam Bassett, DVM (Lincoln, NE)
James L. Bittle, DVM (Rancho Santa Fe, CA)
Nancy O. Brown, VMD (Plymouth Meeting, PA)
Willie R. Reed, DVM, PhD (West Lafayette, IN)
Mo Salman, DVM, PhD (Fort Collins, CO)
Lin Zucconi (Truckee, CA)

New Time-Bites on Stomach Tubes
Dr. Susan Aiello (susan@words.world.net), our Time-Bites Editor, notes that several new historical mini-stories have just been released for publication on the Veterinary Information Network. This latest four-item set focuses on the invention and use of stomach tubes over time:

Dr. Monro’s “Contrivance” for Bloated Cattle, Edinburgh, Scotland, 1793
Mayhew’s Technique for Passing Stomach Tubes in Horses, London, England, 1847
Revival of the Stomach Tube in America, Saint Louis, Missouri, 1904
Stomach Lavage and Gavage for Dogs and Cats, Houston, Texas, 1924

Needless to say, Dr. Aiello is always looking for interesting and educational Time-Bite history topics and/or authors who would like to compile them.

Meeting and Event Calendar

2018
Nov. 30-Dec. 2 Equine History Collective Conference

2019
April 15 Student History Essay Contest deadline
Aug 2-6 AVMHS 42nd Annual Business Meeting and Program, Washington, D.C.

New Books
Bailey, Gregory T., Anton duPlessis, Robin Brandt Hutchison, Justin Curtsinger. A Time of Resolve: Texas A & M during the Great Depression.
